032 Environmental Protection and Pollution Prevention Policy		

Environmental Protection and Pollution Prevention Policy

The Company is committed to conducting its ship management and maritime operations in an environmentally responsible manner. We recognize that our activities, including the management of bulk carriers, may have potential environmental impacts on the marine and atmospheric environment. Therefore, we are dedicated to preventing pollution, protecting natural resources and continually improving our environmental performance across all operations.

This policy forms an integral part of the Company's Safety Management System (SMS) and supports our strategic direction and long-term sustainability objectives.

Top Management fully endorses this Environmental Protection and Pollution Prevention Policy and accepts accountability for its effectiveness. Management ensures that this policy is:

- Compatible with the Company's context and strategic goals
- Communicated, understood, implemented and maintained at all levels
- Supported with adequate resources, training, and leadership

Environmental protection is a shared responsibility across all ranks, both onboard and ashore.

The Company's goal is to achieve:

- **ZERO oil spills**
- **ZERO marine pollution incidents**
- **ZERO atmospheric pollution events**

We aim to prevent environmental incidents through effective operational controls, maintenance, monitoring and adherence to best industry practices.

The Company shall:

- Comply with all applicable environmental laws, regulations, and international conventions
- Apply responsible standards even where formal regulations do not exist
- Cooperate fully with flag administrations, port authorities, and regulatory agencies

We actively support the development of science-based environmental regulations and industry initiatives.

To minimize environmental impact, the Company will:

- Maintain vessels and equipment to prevent leaks, spills and emissions
- Implement procedures to manage waste, discharges, and hazardous materials
- Respond quickly and effectively to environmental incidents in cooperation with relevant authorities and industry organizations

032 Environmental Protection and Pollution Prevention Policy		

The Company is committed to sustainable resource use by:

- Using energy, water and materials efficiently
- Minimizing waste generation
- Promoting segregation, reuse and recycling where feasible
- Reducing waste sent to landfill wherever operationally possible

Long-term sustainability is a key consideration in consumable and operational planning.

The Company operates ethically and will not support any incentive or cost-reduction practices that could compromise environmental compliance or safe maintenance of machinery space systems and pollution prevention equipment.

Environmental performance shall never be sacrificed for financial or operational shortcuts.

All employees, contractors, and third parties working on behalf of the Company are expected to support this policy.

Top Management has approved this statement.
